### **DETAILED ACTION**

Claims 10-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

As to claims 10-12; on p. 6, “greater” (line 10) does not appear to be consistent with the equation in the box of Figure 3. Specifically, the box suggests that if “Delta U” is large, that the value of “Ucontrol” (i.e. voltage requirement of the actuator,  $U_a$ ) actually decreases (not increases). In addition, please note that Figure 3 is internally inconsistent. Specifically, the equation in the box indicates that as “Delta U” increases, that “Ucontrol” (i.e. voltage requirement of the actuator,  $U_a$ ) should decrease; and yet, the graph indicates that as “Delta U” increases, that “ $U_a$ ” increases. This is not consistent.

Claims 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Rueger et al.

As to claims 9,10,11, Rueger et al (EP 1 138 909) teach (ABSTRACT; and Para 87) a method to determine a correction, including: measuring a voltage difference; and adapting the control signal from that voltage difference.

Claims 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
